Advice for Cologne residents with an international family background

Who is the programme for?

Municipal Integration Management (KIM)'s case management is targeted at Cologne residents with an international family background who are not given priority support from job centres.

We would also like to make clear that people with a temporary residence permit or a toleration (Duldung) are also included. Specialised support is also provided for the following target groups:

- Cologne residents with an international family background and a disability
- Cologne residents with an international family background from the LGBTQI+ community

Case management advice

- Socio-educational advice on work and education, language learning, social services, health, living, and social participation
- Long-term support with the integration process, arranged individually
- Help dealing with authorities

Who we are

Participating in case management is voluntary, free of charge, and confidential. It is provided exclusively by social-welfare providers in Cologne.

Case managers speak various languages.
